Election/Restriction

* This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: **Independent Claim(s) 11**, drawn to integrated circuit comprising:

logic circuitry to be tested using test vectors generated by an external tester;

a test control block to control testing of the logic circuitry; and
a test response and analysis unit to receive test results from the logic circuitry in response to the test vectors, to produce a compact representation of said test result and to output said compact representation to the external tester.

Species II: **Independent Claim(s) 10, 12** and dependent claims thereof, drawn to tester for testing logic circuitry of an integrated circuit, comprising a **programmable test vector generator for generating test vectors** for the logic circuitry.

* Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

* Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

* Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

* Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in the rejection under 35 U.S.C. 103(a) of other invention.

* Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
